	N/A	44. Total Cost of Care	X	X	HP Claims Submission
Resource Use Domain Weighting			Value Based P4P / Shared Savings		

Payment

- Baseline** = Indicates that the measure is in its first year of reporting and will not be used for payment this year (because it is not possible to assess relative improvement). It is intended for payment next year.
- Testing** = Indicates that the measure is being tested with the intent of adding it to the measure set next year, but will not be used for payment or public reporting this year.

Public Reporting

- *** = In general, The Office of the Patient Advocate (OPA) reports all measures that are available for public reporting; final decisions are made when baseline data becomes available for analysis. For measures in baseline year, OPA will not publicly report the measure but will consider whether the measure will be included in the following year's public reporting and whether it will be included in the star ratings or as a stand-alone measure.
- 1** = Indicates the measure is reported on the OPA Report Card but not included in a topic star rating or the Medical Group Provides Recommended Care star rating.
- N/A** = The Patient Experience questions are collected and administered by California Healthcare Performance Information System (CHPI), including decisions about public reporting.

Data Source

- Clinical Submission** = Self-reporting POs and health plans submit audited files of numerator, denominator, and rate for these measures unless otherwise specified.
- PAS** = The Patient Assessment Survey is a CG-CAHPS survey administered by CHPI.
- HP Claims Submission** = Health plans submit eligibility, claims/encounter, and cost data to IHA data aggregator to run these measures.
